We are in need of skillful, energetic and creative interns who have the thirst for learning and are eager to experience real work-life culture in our organization while building their technical knowledge in web development and database design. As an intern, you will be working alongside experienced developers in developing applications.

Responsibilities

- Develop web applications including coding and mock-up design.
- Involve in IOT data collection and analysis.
- Backend integration via REST API.
- Experienced in building and managing live/real-world web systems using PHP Laravel Framework.
- Knowledge in developing quality SQL queries.
- Perform data analysis and explore the potential of machine learning.
- Perform functional analysis, conceptive and detailed design, documentation, coding and testing for the application modules assigned.

Qualifications

- Possess at least a diploma, advanced/higher/graduate diploma in Computer Science/Information Technology, Engineering (Computer/Telecommunication) or equivalent fields.
- Required skill(s): PHP, HTML5, Java, Python.
- Compulsory skill(s): PHP, Java.
- Good understanding of front-end technologies.
- Eager to learn new technologies or to be trained.
- Passion for technology and excellent communication skills.
- Possess excellent analysis, research and troubleshooting skills.

Job Benefits

- Internship allowance.
- Cell phone reimbursement.
- **Candidate with great potential and commitment will be offered as a permanent staff after internship period ends**
